

Sail Labs Technology AG is a leading global provider of speech recognition technology and was founded in 1999 in Vienna, Austria. We are one of the world's leading innovators in the field of Open Source Intelligence (OSINT) and speech and language technology systems, creating cutting-edge software for speech and multimedia analysis solutions. SAIL Labs develops technologies to mine multi-media data and text including the indexing of audio, video and text, automatic speech recognition, transcriptions in multiple languages, named entity detection as well as topic detection. Our solutions allow content based search in multi-media files, automatic summarization and visualization. SAIL LABS Technology supports commercial applications (e.g., news monitoring, broadcast news transcription and indexing) as well as government applications (e.g., public opinion monitoring, surveillance and intelligence gathering).

We are currently looking for a new

Software Developer (m/f)
